

Corporate & Commercial

“ We advise on every aspect of commercial law, from human resources and commercial contracts to advertising, data protection and intellectual property. But we are more than simply reactive: by understanding our clients’ commercial opportunities, we can be instrumental in helping their businesses to grow. We also advise and act for clients who require funding from financial institutions in respect of their business dealings through the use of Gibraltar companies.”

Commercial

Our expertise and resources provide comprehensive support for business and commercial transactions.

This includes advice on commercial contracts, human resources, data protection, advertising, and intellectual property issues, such as trademarks and patents.

Our approach is to gain a real understanding of the commercial opportunities open to our clients so that we can help them grow their business.

We also advise international banks on the capacity and security aspects of funding involving Gibraltar companies. Gibraltar is increasingly becoming established as an attractive EU holding company jurisdiction.

Capital Duty and Tax Planning

We are active and innovative in helping many Fortune 250 companies in their capital duty and tax planning.

Numerous global corporations have used our expertise to help them set up European operations and transfer assets in a capital duty and tax efficient manner.

Corporate Structuring and Reorganisations

Given Gibraltar's favourable tax regime and our position as the leading local law firm, we can advise and help manage our corporate clients' tax matters very effectively.

We advise FTSE 100 companies on how they can benefit from holding company structures to mitigate European withholding taxes.

Online Gaming

We have worked, and continue to do so, with the Gibraltar Government to develop the online gaming industry in Gibraltar.

Recent successes include the listings on the London Stock Exchange of our clients, such as PartyGaming PLC and 888 Holdings PLC.

We have advised on all aspects of regulatory tax, corporate and employment matters, as far as the gaming sector is concerned.

Joint Ventures

We often advise clients on joint ventures. We have a creative and practical approach, underpinned by sensible exit strategies.

We gain a complete understanding of clients objectives and use the flexibility offered by Gibraltar's jurisdiction to reach the desired goals.

Structured Finance

We create and manage complex cross-border products and financing structures for major companies and financial institutions.

These structures include securities, derivatives and insurance products.

We advise our clients fully on all aspects of Gibraltar law and all required documentation.
